VA's BHIE Project wins e.Gov award

San Diego, CA – 11MAY06 -- abcISP, Inc. the 8(a) certified and veteran owned Technology and Management services of choice, today announced that it won a major new contract with the Department of Veterans Affairs, Veterans Health Administration (VHA).

The new work calls for abcISP to operate the VHA's Security Integration Lab (SIL), located in San Diego, California, that conducts security testing of many of the VHA enterprise-wide software and network development initiatives. The VHA said that they required a firm with "...advanced (security) certifications and experience in cutting edge application security..." With this award, the VHA continues to demonstrate its trust and faith that abcISP, a veteran owned small business, can provide security integration testing for its new J2EE based applications and cutting edge networking infrastructure. This work was previously performed by a fortune 50 company.

Alex Barron, the CEO and Founder of abcISP, says "this win exhibits our firm's success in being the vendor of choice to provide stable, secure and simple-to-implement Technology and Management solutions. If the government exercises all options, this contract is valued at more than 3.2 million dollars. We have successfully provided and continue to provide similar services for the Military Health System. abcISP is committed to solving its customers' problems in a timely and cost effective manner.

abcISP (www.abcisp.com) is a closely held Technology and Management services firm specializing in providing stable, secure and simple-to-implement innovative and custom solutions for the government and commercial Life Science community.
